SAT SINGLE LTC BLACK converter is a full-range device, designed to receive satellite programs, broadcast in vertical and horizontal polarisation. Ideally suited for reception of digital high-definition HD television. The device works perfectly with all available receivers on the market. The converter has a proven protective system, which avoids damage to the connectors by accumulated water. This allows to significantly extend the failure-free lifetime of the device. The minimised noise factor enables optimum signal reception, even in extreme conditions. This guarantees a smooth image, free from any interference even under difficult weather conditions. The highest quality materials and high manufacturing precision guarantee long, trouble-free operation of the device and user satisfaction.

Especificación

Tipo de producto:	convertidor satélite
Temperatura de funcionamiento:	-40 ° C ... 65 ° C
Factor de ruido:	0.1 dB
Rango de frecuencia de salida inferior:	950 - 1950 MHz
Rango de frecuencia de salida superior:	1100 - 2150 MHz
Rango de frecuencia de entrada superior:	11.7 - 12.75 GHz
Rango de frecuencia de entrada inferior:	10,7 - 11,7 GHz
Rango de frecuencia inferior del oscilador local:	9,75 GHz
Rango de frecuencia superior del oscilador local:	10,6 GHz
Refuerzo:	60 dB
VSWR:	2.5:1
Garantía:	12 mc
